EDUCATION

FAST-NUCES

Expected Graduation: June 2025

Bachelor of Software Engineering

Key Courses: Computer Networks, Database Systems & Design, Design & Analysis of Algorithms, Operating Systems, Data Structures, Web Engineering, Object-Oriented Programming, Software Design & Architecture, Software Quality Assurance

SKILLS

Programming Languages: Go-Lang, Javascript (NodeJS & Vanilla), Bash, Java, C-Lang, Oracle Database, MongoDB, HTML/CSS

Libraries & Tools: Git, Docker, Linux, WSL, ExpressJS, JavaFX

WORK EXPERIENCE

Teaching Assistant - Operating Systems

Jan 2024 – Jun 2024

FAST - NUCES

Karachi, Pakistan

Demonstrated strong organization, communication, and time management skills by efficiently working with instructors to manage and maintain the grades of 90 students

Programmed an assignment evaluation tool, producing significant time savings and highlighting problem-solving skills

PROJECTS

Load Balancer

Jan 2022 – May 2022

Distributed Systems Project

Go-Lang, ExpressJS, Docker, Git, HTML

Designed and implemented a high-throughput HTTP reverse proxy, achieving efficient traffic distribution

Enhanced application scalability and reduced computation overhead using GOROUTINES and buffered channels

Boosted the load balancer's reliability by implementing health checks to ensure backend servers' availability

Project Management System

Aug 2021 – Dec 2021

Web Development Project

ExpressJS, MySQL, Handlebars, Git

Developed a robust webserver architecture for a project management system using ExpressJS and MySQL

Facilitated seamless interaction and data flow within the application by orchestrating communication between services

Secured the system's services by employing API keys and JWT authentication

Visualizing Convex Hulls

Jan 2021 – May 2021

Java Project

Java, JavaFX, Git

Translated research papers into practical applications using JavaFX

Conducted an analysis of computational complexity by implementing and executing various convex hull algorithms

Pyonic Reader

Aug 2020 – Dec 2020

Python Project

Python, BASH, Git

Developed a Python CLI tool to parse PDFs and bold the initial letters of every word to improve reading focus for people with ADHD

Assess Buddy

Jan 2020 – May 2020

Bash Project

BASH, Git

Coded a bash tool to streamline the extraction, compilation, and execution of compressed folders and source code

Rent a Car & Autoshop

Aug 2019 – Dec 2019

Web Development Project

ExpressJS, MySQL, Git

Developed an ExpressJS-based app with a normalized MySQL database for efficient CRUD operations

A Night in the Woods

Jan 2019 – May 2019

Java Game Development Project

Java, Java Swing, Git

Designed and implemented a 2D platformer game in Java Swing, utilizing multithreading to support background audio

VOLUNTEER EXPERIENCE

Team Guide

Destination Imagination Pakistan 2024

Mentored K-12 students, encouraging creativity and problem-solving skills

Contributed to a positive team experience, resulting in strengthened leadership and mentorship abilities

Jan 2024
Islamabad, Pakistan

AWARDS & HONORS

- Dean’s List of Honors: Fall 2023 (SGPA: 3.73/4.00), Spring 2024 (SGPA: 3.80/4.00)
