EDUCATION

- **FAST-NUCES Bachelor of Software Engineering**

Expected Graduation: June 2025

Key Courses: Computer Networks, Database Systems & Design, Design & Analysis of Algorithms, Operating Systems, Data Structures, Web Engineering, Object-Oriented Programming, Software Design & Architecture, Software Quality Assurance

PROJECTS

- **Load Balancer** [Go Lang, ExpressJS, Docker, Git, HTML]

Designed and implemented a high-throughput HTTP reverse proxy, achieving efficient traffic distribution. Enhanced application scalability and reduced computation overhead using GOROUTINES and buffered channels. Boosted the load balancer's reliability by implementing health checks.

- **Project Management System** [ExpressJS, MySQL, Handlebars, Git]

Developed a robust webserver architecture for a project management system using ExpressJS and MySQL, utilizing microservice architecture. Facilitated seamless interaction and data flow within the application. Secured the system's services by employing API keys and JWT authentication.

- **Visualizing Convex Hulls** [Java, JavaFX, Git]

Translated research papers into practical applications using JavaFX. Conducted an analysis of computational complexity by implementing various convex hull algorithms.

- **More Projects** [Python, BASH, ExpressJS, MySQL, Java, Java Swing, Git, HTML]

- Pyonic Reader: Developed a Python CLI tool to parse PDFs and improve readability for people with ADHD.
- Assess Buddy: Coded a bash tool to streamline the evaluation of student-submitted assignments.
- Rent a Car & Autoshop: Developed an ExpressJS-based app for efficient CRUD operations.
- A Night in the Woods: Designed and implemented a 2D platformer game in Java Swing.

LEADERSHIP EXPERIENCE

- **Microsoft Learn Students Ambassador**

Coordinated technical activities for a workshop with approximately 50 participants. Curated and managed workshop materials. Assisted the event management team to ensure smooth execution.

SKILLS

- **Programming Languages**

Go-Lang, Javascript (NodeJS & Vanilla), Bash, Java, C-Lang, Oracle Database, MongoDB, HTML/CSS

- **Libraries & Tools**

Git, Docker, Linux, WSL, ExpressJS, JavaFX

WORK EXPERIENCE

- **Teaching Assistant - Operating Systems**

FAST-NUCES, Karachi, Pakistan

- Demonstrated strong organization, communication, and time management skills by efficiently managing grades for 90 students.
- Programmed an assignment evaluation tool, highlighting problem-solving skills.

VOLUNTEER EXPERIENCE

- **Destination Imagination Pakistan 2024**

Acted as a team guide and mentored K-12 students, encouraging creativity and problem-solving skills.

AWARDS & HONORS

- **Dean's List of Honors**

Fall 2023 (SGPA: 3.73/4.00), Spring 2024 (SGPA: 3.80/4.00)
